[1] The scan rate is proportional across the full range of resolutions supported by the scanner. Actual scan times will depend on the host system performance. Quoted top speeds maybe limited by the effective bandwidth of the USB2 or ethernet i/f and are not guaranteed for all media types. [2] Turbo Mode speeds can be twice as fast as regular non-turbo speed ratings but offer virtually no image quality gains over scans made at half the quoted resolution. Turbo mode scanning uses digital software interpolation to double the resolution in the paper scan direction to simulate higher resolution scanning. [3] The achieved scan accuracy may vary depending on the operating environment and the type & thickness of media. [4] The maximum resolution & size selectable for an image is limited by the file format specified, the available disk space & the computer operating system. [5] 16 colour RGB (4-bit) adaptive indexed palette images are a feature of the optional Colortrac ScanWorks software. [6] Languages supported: Arabic, Chinese (Traditional), English, French, German, Italian, Japanese, Korean, Portuguese, Russian, Spanish. [7] Microsoft WIA/STI is specified for the USB interface only. [For Colortrac's recommended minimum PC specification, go to: www.colortrac.com/support/system_requirements.htm.] [Colortrac SmartLF scanners comply with CB, CE, FCC, UL and RoHS standards and regulations.
